Craig, I guess the solution would be to have Marta put the suggestion in the letter, we will send back to the review that IHR reps will have invites. (maybe a stipulation to only target glucotrol/viagra clients) Not sure it will go thorough but we could try. I hate to disadvantage the other teams on this project.

Isn't it the grants committee who will review? Let me know when we have the approval, Lance - our reps would be glad to distribute too

Thanks

Our RC has allowed rep distribution of CME program invitations if the accrediting body has sent a written request asking for such support/help. I could see how Neurontin could prevent this on this program though. If Tina your RC is comfortable with it I would be happy to take such a request letter to our RC.

Hey guys, update, please provide me feedback on the IHR reps question, not sure if we can do but your feedback will help.

Tina:

I picked up the changes from Craig this afternoon. We will make them and resubmit it to you. I think that it would be prudent to include the grant request letter from the CME provider which I believe we could get to you by the time you are back in the office. I will defer to Mary Ann for the final say on this point.

For future reference, there is a version of the budget that we usually provide that is less specific and accompanies the grants request from the CME provider. Some of the changes being requested by the grants committee would have not come up with this version. Anyway, I understand from the voicemail that Craig received from the committee member that with the changes requested, approval should not be a problem.

On another note, we have been approached by Proworx to include our symposium invitation in a medical bag insert for doctors at ADA and for distribution to IHR reps for them to hand out to their physicians. Can we give the invites out to the IHR reps? My understanding with the current environment for Neurontin, that despite this being a CME program, you probably do not want reps handing out invites to a program discussing in part an off-label uses for Neurontin. I discussed this point with Craig and he confirmed that CME invites have been given to reps for on-label programs. He deferred to your judgment and experiences on this one. Please also refer to my voicemail on this subject.

Regards,
Marta

Marta,

Grants committee did not approve this yet, needed some more information and wanted the Pfizer name removed on some of the documentation. I am out of the office in San Fran until next monday, I asked craig to get the comments back and provide to you if that is ok. 3-6628.

Dear Tina and Lance:

As per my conversations with Tina, I am forwarding two budget proposals for your review. One is the satellite symposium alone and one includes a highlights proceedings (the more cost-sensitive enduring material) with the satellite. Please review and let me know which avenue you want to pursue so that we can move forward with the grant request through Dannemiller. I look forward to your decision and thanks in advance for your quick attention to this matter.

Please do not hesitate to call me with any questions.

Kind Regards,
Marta
